All the inhabitants of a particular town, area, or country. A particular section, group, or type of people or animals living in an area or country.

The action or influence of things on one another

The prevention of wasteful use of a resource.

An animal that naturally preys on others

Also known as a top predator, an apex predator is an animal found at the top of the food chain, without natural predators.

A mid-ranking predator in the middle of the food web, which particularly preys on smaller animals.

An animal that is hunted and killed by another for food.

A biological community of interacting organisms and their physical environment.

To restore (an area of land) to its natural uncultivated state (used especially with reference to the reintroduction of species of wild animal that have been driven out or exterminated)

The quantity or amount of something, e.g., a chemical element or an animal or plant species, present in a particular area, volume, sample, etc.

The variety of life in the world or in a particular habitat or ecosystem.

To reduce the population of (a wild animal) by selective slaughter.

A sum paid for killing or capturing a person or animal.

The commercial organization and operation of vacations and visits to places of interest.
