Who has been affected by the changes in wildlife on Cape Cod?
(Make a list- don't think of the how & why yet)

As you watch the video interviews, note the names of individuals or groups they represent.

Identify 3 groups or individuals from the class list or video, and outline **who** they are, **how** they are affected, and **when** they have or will be effected.

Select one individual or stakeholder you want to take on the role of in the community.

Who is that person or group?

Find at least one resource that shows this individual has or will be effected and share a bit of the how.
