

# EXPLORING THE WHITE SHARK LOGBOOK

[HTTPS://SHINY.ATLANTICWHITESHARK.ORG/LOGBOOK/](https://shiny.atlanticwhiteshark.org/logbook/)

Use the white shark logbook to review data and answer the questions below for each shark. The 'WS' stands for white shark, and refernces individual white sharks in the northwest Atlantic population.

WS Broken Tail

WS Ashley Grace

Explore the receiver data on the Logbook. What are some of your observations? What do you notice?		
What is the total number of detections for each shark?		
When was each shark tagged?		
In each shark's most recent year of detections, what month was it most active?		
What is the size of each shark? Circle the shark name at the top for the one that is bigger.		

Do we have the same amount of data for each shark?

Why do you think the data is different or similar for each shark?
